

East Allington Parish Hall Management Committee

Mission Statement

Our aims as Committee members of East Allington Parish Hall are: to provide an accessible, well-maintained Parish Hall that welcomes both young and old and encourages a strong community atmosphere; to continue to improve the hall and its facilities as a resource for the local community and the wider community as a whole.

The Committee will arrange occasional open discussions with the community to find out what they require from their Parish Hall in order to get the maximum benefit from it, whether to ensure the upkeep of the Hall or to bring forward ideas for social and community events.

The Parish Hall has recently been updated to a high, energy-efficient standard. The Committee will ensure that all who use the Parish Hall do so with the peace of mind that their safety is paramount and that we have the systems and procedures in place to minimise any risk to them. The Committee will carry out regular risk assessments to ensure facilities and equipment are safe for use, and provide easy access to detailed drawings showing the location of fire exits and fire-fighting equipment should it be required for use in an emergency.

In order to achieve these aims, the Committee will actively consider all available grants and look at a wide range of methods of fund-raising to supplement the Hall's rental income and fund and ensure future maintenance and improvement projects.
